PROFILE

An enthusiastic web developer who is ready to develop and innovate, combining clear code with imaginative ideas to create practical digital solutions.

EDUCATION

Government Associate College

Shahdara, Pakistan

Intermediate

2021 – 2023

- Among the top 5% of the batch

University of Engineering and Technology Lahore

Lahore, Pakistan

Bachelors of Science in Computer Science

2023 – 2027

- Maintaining good academic standing with a 3.17/4.0 CGPA.

SKILLS

Technical: HTML, CSS, Bootstrap, JavaScript, Python, MySQL, C++

CERTIFICATIONS

- Effective Business Website
- Introduction to Cyber security
- Basics of python

EXPERIENCE

Front-End Web Developer, GigaLabs | **Onsite**

Lahore, Pakistan

- Developed responsive websites using HTML, CSS, JavaScript and React to enhance user experience.
- Improved comprehension of frontend development principles, such as layout design, and UI improvements.

Computer Operator, BenchMark

Lahore, Pakistan

PROJECTS

E-commerce Website

- Using React, a responsive e-commerce website with dynamic product listings and cart functionality was created.
- Made important UI decisions that prioritized mobile design, reusability, and clean code.

To-Do App

- Using React, I developed a dynamic task management application with add, delete, and complete features.
- useState was used to implement state management, and a responsive, tidy user interface was guaranteed.

Mini Projects

- Created a **calculator** with responsive design that uses React to carry out simple math operations.
- React logic was used to build a **tic tac toe** game that tracks player movements and determines the winner.
- Created a **currency converter** with state updates and real-time input handling.
- Created a **Weather App** interface with props and an API-ready layout.

Academic Projects

- School Management System:
Developed a full-fledged web application to manage student records, teacher data, attendance, fees, timetables, and exam results with role-based access for admin, teachers, students, and parents
- Online Quiz Management System
Developed a console-based quiz application in C++ using Data Structures and Algorithms (DSA) to manage quiz creation, question storage, user registration, score calculation, and result display. Implemented using arrays, linked lists, and file handling for efficient data storage and retrieval

ACHIEVEMENTS

- Coding Competition: recognized by the Codator Society for having excellent programming and problem-solving abilities.
- Winner in Quiz Competition: Proved general knowledge and quick thinking by placing second in an interdepartmental quiz.
